PROFILE SUMMARY

Node.js Backend Developer with 1 year of experience building backend applications using Node.js, Express.js, MongoDB, and MySQL. Experienced in developing RESTful APIs, JWT authentication, database operations, API validation, and real-time backend features. Strong understanding of scalable and maintainable backend architecture.

WORK EXPERIENCE

Junior backend developer at Applaunch Bangalore Pvt Ltd

May 2025 - Jun 2026

- Developed and maintained 100+ RESTful APIs and backend services using Node.js, Express.js, and MongoDB for multiple applications.
- Independently owned 3 backend projects end-to-end, covering API development, business logic, database operations, authentication, validation, and testing.
- Built backend functionality for a Meditation Builder platform, integrating FFmpeg for audio processing and personalized meditation audio generation.
- Implemented JWT-based authentication and API validation, reducing invalid requests by ~30%, and collaborated with Frontend, QA, and DevOps teams for integration.

Web Developer intern at WayEva Innovations Pvt Ltd

Jan 2025 - Mar 2025

- Developed backend functionality using Node.js, Express.js, and MySQL for a course management platform supporting 12+ courses.
- Implemented user registration, authentication, course enrollment, and profile management functionality.
- Integrated a payment gateway with server-side transaction validation for secure course enrollment payments.

TECHNICAL SKILLS

- Languages: JavaScript
- Backend: Node.js, Express.js, RESTful APIs, WebSockets
- Databases: MongoDB, MySQL
- Authentication & Validation: JWT, Joi
- Testing & Tools: Jest, Postman, Git, GitHub, Bitbucket
- Cloud & Other: AWS, FFmpeg

PROJECTS

Meditation Builder | Node.js, Express.js, MongoDB, FFmpeg, JWT

- Built a backend enabling dynamic creation of meditation audio, supporting 10+ audio configurations, with JWT-based authentication and REST APIs for registration and login.
- Integrated FFmpeg audio processing to mix ambient sounds and voice tracks, generating personalized audio in under 5 seconds based on user frequency settings.
- Designed scalable MongoDB data models, supporting efficient audio retrieval with query response times under 200ms.
- Implemented input validation and error handling across 30+ API endpoints, reducing unhandled errors by ~25%.

ImInNeed — Real-Time Emergency SOS Platform | Node.js, Express.js, MongoDB, WebSockets

- Developed a real-time emergency SOS platform, enabling 300+ users to instantly alert nearby contacts and responders during critical situations.
- Built location-based alert and notification logic using WebSockets, delivering emergency signals in under 2 seconds.
- Designed backend architecture for real-time data handling, supporting 50+ concurrent SOS requests with minimal latency.

EDUCATION

Master of Computer Applications(CGPA - 7.94)

Feb 2023 - Dec 2024

- Brindavan College Dwarakanagar, Yelahanka, Bengaluru

Bachelor of Science(Percentage - 78%)

Aug 2019 - Nov 2022

- Padmashree Institute of Management and Sciences
